

A Fresh New Look is Coming to Our Lake Mills Branch

We are excited to share that a full remodel of our Lake Mills branch is officially underway. This project is especially meaningful because it is the first complete renovation of the building since it opened in 1978. After many years of serving our community in this space, it is time to refresh the environment and create a modern, comfortable place for both customers and employees.

The remodel will move forward in several phases. Phase one focuses on the back of the building where our loan processing and loan servicing teams work. Phase two will shift attention to the offices in the front of the branch. Phase three will focus on the teller line and banker desks. Exterior improvements to the drive-thru and parking lot are planned for the spring and will help complete the full transformation of the property.

The full project is expected to continue into the summer of 2026. Throughout the entire remodel, we will remain open and ready to serve you. While the layout of the building may shift from time to time, our staff will guide you through any temporary changes and help ensure your visit remains smooth and easy. You can expect the same friendly faces and the same personal service you have always received from us.

This renovation reflects our commitment to creating a space that better supports everyday interactions. We want customers to feel welcome the moment they walk in, and we want our employees to have a workspace that helps them do their best work. The updated design will bring a brighter and more efficient layout that aligns with the way people bank today.

As construction moves forward, we will share updates and previews so you can see the progress and get a glimpse of the improvements taking shape. We are truly excited to watch this project unfold and to create a refreshed space that will serve our community for many years to come.

Thank you for your patience and support during this important step in our future. If you have any questions during the remodel, our staff is always here to help.
